<i>Teucrium disjunctum</i>		Replaces <i>Spartothamnella canescens</i> (<i>Nuytsia</i> 28)
<i>Tripogonella loliiformis</i>		Replaces <i>Tripogon loliiformis</i> (<i>Taxon</i> 65)

Changed Family

Calandrinia has been moved from Portulacaceae to Montiaceae to align with APG 4 (*Botanical Journal of the Linnean Society* 181)
Please note that the physical collections of *Calandrinia* are still filed under Portulacaceae at the WA Herbarium (including the Reference Herbarium) and will be moved later this year.
